The enclosed DD 214 on "Captain Robert Groden" was passed to me and is bogus. It will take awhile to figure out what his real background is. The #SS, birthdate, and name are accurate and his. I trust you will keep it to yourself. His former lawyer, the president of a draft board, is working on it, along with others. He has made enough enemies to hang him, and I'm sorry to see Feinman go down with him, because that is what is going to happen. I will insure it.

I'm glad I helped Random's lawyers and they thanked me for it in writing. I saw it as a First Amendment issue, just as I think you have a right to be heard and told C & G that. I despise Posner and told them that too, and they know now, from me, just how fraudulent his book is. At lease we are not enemies. They didn't publish my mug shot!

There has to be a free market place of ideas, as the court found long ago in the Red Lion case.

Best wishes,

Harry
